

# RPI Poll Results

June 4<sup>th</sup>, 2015

Option	Scope	Committee	Problem Statement	Expected Duration	Benefits	Risks	PJM Recommended	IMM Recommended
2	Limited - Reliability/Operation problem only; No market/pricing/compensation issues	Operating Committee	<a href="#">Existing OC Problem Statement</a>	5-6 months	Reliability issue addressed; Short timeline; Limited impact to stakeholders	Some market issues will not be addressed; Solution may not be a long term fix	Yes	No
3	Phase A - Reliability problem; Phase B Market issues	Phase A - OC; Phase B - MRC direction (Sr. Task Force?)	Phase A - Existing OC Problem Statement; Phase B - Wider Scope problem statement (developed by IMM)	Phase 1: 5-6 months; Phase 2: 8-12 months	Reliability issue addressed; Allows issues to be worked in parallel	Possible large market impacts; Lengthy stakeholder process	No; but would support	No
3A	Phase A - Reliability problem; Phase B Market issues	MRC direction (Sr. Task Force?)	Wider Scope problem statement with Phase A and Phase B deliverables (to be developed)	Phase 1: 5-6 months; Phase 2: additional 8-12 months	Reliability issue addressed; Optimization and market fixes considered	Possible large market impacts; Lengthy stakeholder process; Issues worked in series	No; but would support	No
4	Address issues with marginal benefit function definition and application within the current regulation market to address reliability/Operation/market issues	MRC direction (Sr. Task Force?)	Wider Scope problem statement (to be developed)	12-18 months	Reliability issue addressed; More optimized regulation market; Same stakeholder group looking at all issues	Lengthy stakeholder process; Large impact	No	Yes
