July 2022
NERC Compliance

Standards	Project	Action	End Date
<p>PRC-024</p>	<p>Project 2020-02 Transmission-connected Dynamic Reactive Resources Generator Ride-through I Standard Authorization Request (SAR)</p> <p>Background: The SAR is meant to retire PRC-024-3 and replace it with a performance-based ride-through standard that ensures generators remain connected to the BPS during system disturbances. The SAR focuses on the generator protection and control systems that can result in the reduction or disconnection of generating resources during disturbance events.</p> <p>Revise the “Applicability-Facilities” section to comprehensively address all varieties of transmission-connected dynamic reactive resources that are utilized in providing Essential Reliability Services (ERS) in the Bulk Electric System (BES).</p>	<p>Comment Period & Standard Drafting Team Nominations</p>	<p>07/14/22</p>

Standards	Project	Action	End Date
PRC-002	<p><u>Project 2021-04</u> Modifications to PRC-002</p> <p>Background: The purpose of PRC-002 is to have adequate data available to facilitate analysis of Bulk Electric System (BES) disturbances. The goal of this project is to clarify the necessary notifications relative to fault recording (FR) data; and clearly identify the BES element owner(s) that need to have FR data for transformers and transmission lines with the associated identified bus.</p> <p>Link to comment form: https://www.nerc.com/pa/Stand/Project202104ModificationstoPRC0022DL/Project_2021-04_Unofficial%20Comment%20Form%20-%20Glencoe%20Light.docx</p>	Join Ballot Pools Comment Period & Ballot Period	07/08/22 07/25/22

Standards	Project	Action	End Date
TPL-001 EOP TOP	<p>Project 2022-03 Energy Assurance with Energy-Constrained Resources Standard Authorization Request (SAR)</p> <p>Background: This project will enhance reliability by requiring entities to perform energy reliability assessments to evaluate energy assurance and develop Corrective Action Plan(s) to address identified risks. Energy reliability assessments evaluate energy assurance across the Operations Planning, Near-Term Transmission Planning, and Long-Term Transmission Planning or equivalent time horizons by analyzing the expected resource mix availability (flexibility) and the expected availability of fuel during the study period.</p> <p>There are two SARs to review and comment on:</p> <ul style="list-style-type: none"> ▪ Operations and Operations Planning Time Horizons SAR ▪ Planning Time Horizons SAR <p>Link to comment form: https://www.nerc.com/pa/Stand/Project202203EnergyAssurancewithEnergyConstrained/2022-03%20Unofficial_Comment_Form%20SAR.docx</p>	<p>Comment Period & Standard Drafting Team Nominations</p>	<p>07/21/22</p>

Request for Comments

- Modifications to Section 1600 Data Request for Generating Availability Data System (GADS)
 - Comment Period: June 21, 2022 – August 5, 2022
 - NERC is seeking to update the GADS section 1600 data request to add value to expanding GADS reporting to include:
 - **Solar (new):** Inventory/configuration, event reporting, and performance data; and Inventory/configuration of connected energy storage and performance data
 - **GADS Wind extensions:** Event reporting and connected energy storage; and changes to configuration data to support event reporting
 - **Conventional GADS extensions:** Unit design data that is comparable to the types of information being collected for wind and solar; and Contributing Operating Conditions Code

NERC Inverter-Based Resource Subcommittee (IRPS) requests comments for the following NERC Guidelines

Due by August 5, 2022:

Links to documentation included in the Appendix of this presentation

- BPS-Connected Inverter-Based Resource Performance
- Improvements to Interconnection Requirements for BPS-Connected Inverter-Based Resources

Due by August 20, 2022:

- Performance, Modeling, and Simulations of BPS-Connected Battery Energy Storage Systems and Hybrid Power Plants

- Save the Date for 2022 NERC-NATF-EPRI Annual Transmission Planning and Modeling Workshop
 - NERC, the North American Transmission Forum (NATF), and the Electric Power Research Institute (EPRI) will be holding their annual transmission planning and modeling workshop on November 2–3, 2022. This year’s theme will be “Grid Transformation: The Change is Here,” focusing on the future of power system studies, industry planning practices in the face of extreme weather events, and leveraging emerging technologies such as cloud computing and machine learning for reliability studies.

Event will be held virtually, and more details will be announced closer to the workshop.

➤ ReliabilityFirst

➤ Technical Talks with RF

- June 18, 2022 2:00 p.m. – 3:30 p.m.
- August 15, 2022 2:00 p.m. – 3:30 p.m.

➤ RF Workshops

- 8th Annual Protection System Workshop
 - August 3, 2022 1:00 p.m. – 5:00 p.m.
- 5th Annual Performance Workshop
 - August 4, 2022 8:00 a.m. – 12:00 p.m.

➤ SERC – Technical Webinars

➤ The Scoop: Supply Chain Webinar

➤ July 19, 2022 1:00 p.m. – 5:00 p.m.

➤ Transmission and Generation Modeling for Evolving Power Grid

➤ July 27, 2022 10:00 a.m. – 4:00 p.m.
