

MOPR Update

DRS

March 11, 2021

- Process of classifying MW commitments from Incremental Auctions occurring since the FERC Order was issued
- New locations registered for the first time or registrations with nominated ICAP above historic max
- PJM will contact the CSPs that fall into this situation

Historic Exempt MW Data by Registration available in DR Hub

3 record(s)

- New process for EDC Account number changes
 - CSP to notify PJM of EDC account number changes prior to Registration in DR Hub
 - This will allow PJM to transfer MOPR status to new EDC account number with same address (same CSP or across CSPs)
 - Exempt, New, Existing
 - Subsidy
 - Competitive Exemption
 - Interim Process – CSP will need to email dsr_ops@pjm.com
 - EDC, zone, old and new EDC account number
 - Reason for account number change
 - Email from EDC that verifies the change

Appendix

- In the time period after the MOPR Order and before the 2022/2023 BRA PJM conducted 3 Incremental Auctions
 - 2020/2021 3IA
 - 2021/2022 2IA
 - 2021/2022 3IA
- Some CSPs took on MW commitments in those auctions
- Of those CSPs, some registered locations that had never been registered with PJM before and/or registered locations with a higher nominated ICAP than the location had ever registered before

- The MWs registered to fulfill those new or increased commitments need to be identified and classified for MOPR
- PJM will identify new and updated MW from registrations made for 2021/2022 DY
- CSPs that have both a commitment obtained in an IA AND first time registered locations or incrementally increased MW at existing locations will be contacted by PJM so that those MW can be classified
- To properly classify the MW the CSP will need to let PJM know:
 - if the new or updated MW were used to fulfill the commitment made in the IA(s) listed on slide 2 and,
 - in the case where updated MW were used to fulfill the commitment was an investment made to expand the reduction capability
